CHAPTER : PERMUTATION & COMBINATION

CLASS NO: 4

Digits 0 to 9

Q. 1 ✓ digit = 0 to 9 (if not given)

✓ Four digit number

✓ Repetition of digits allowed (if not mentioned)

$$\boxed{9 \mid 10 \mid 10 \mid 10} = 9 \times 10 \times 10 \times 10 = 9000$$

✓ Repetition of digits not allowed

$$\boxed{9 \mid 9 \mid 8 \mid 7} = 9 \times 9 \times 8 \times 7 = 81 \times 56 = \boxed{}$$

Q. 2 digit = 0 to 9

Four digit odd number.

(i) Rep allowed

$$\boxed{9 \mid 10 \mid 10 \mid 5} \overset{1, 3, 5, 7, 9}{=} 9 \times 10 \times 10 \times 5 = 4500$$

(ii) Rep not allowed

$$\boxed{8 \mid 8 \mid 7 \mid 5} \overset{1, 3, 5, 7, 9}{=} 8 \times 8 \times 7 \times 5 = \boxed{}$$

Q. 3 digits 0 to 9

~~Four~~ Five digit "even" number

(i) Rep of digits allowed

$$\boxed{9 \mid 10 \mid 10 \mid 10 \mid 5} \overset{0, 2, 4, 6, 8}{=} 45000$$

(2) Repetition of digits not allowed

2, 4, 6, 8

(X)

8	9				5
---	---	--	--	--	---

Case I : number ending with 0

9	8	7	6	1	0
---	---	---	---	---	---

 =

Case II : number not ending with zero

8	8	7	6	4
---	---	---	---	---

 =

Req. no. of ways = Case I + Case II =

Q. 4 How many numbers are there between 100 and 1000 which have exactly one of their digit as 7?

✓ 0 to 9

✓ 3-digit No

✓ Rep. allowed

Sol

I

7			
7	9	9	

 = 81

II

	7		
8	1	9	

 = 72

III

		7	
8	9	1	

 = 72

Req no. of ways = 225

Q. 5 How many numbers are there between 100 and 1000 such that atleast one of their digits is 7?

Note

atleast one = total - none

total no of ways

$$= 9 \times 10 \times 10 = 900$$

now : ~~now~~ money for digit is 7

$$= 8 \times 9 \times 9 = 8 \times 81 = 648$$

$$\text{no of ways} = 900 - 648 = 252$$

Ques 6 How many numbers greater than 1000 but not greater than 4000 can be formed with the digits 0, 1, 2, 3, 4 (i) Rep allowed (ii) Rep not allowed.

Sol = 0, 1, 2, 3, 4

(i) Rep allowed

1, 2, 3

$$= 3 \times 5 \times 5 \times 5 = 3 \times 125 = 375$$

$$\text{Req no of ways} = 375 - 1 (\text{for } 1000) + 1 (\text{for } 4000) = 375 \underline{\underline{A_2}}$$

(ii) Rep not allowed

1, 2, 3

$$= 3 \times 4 \times 3 \times 2 = 72 \underline{\underline{A_3}}$$

Ques 7 In, how many ways can 4 prizes be distributed among 5 students, when

- (1) no boy gets more than one prize
- (2) a student may get any number of prizes
- (3) no student gets all the prizes.

(1)

$$5 \times 4 \times 3 \times 2 = 20 \times 6 = 120$$

(2)

$$5 \times 5 \times 5 \times 5 = 5^4 = 625$$

(3)

$$\begin{array}{r} 5 \times 5 \times 5 \times 5 = 625 \\ - 5 \\ \hline 620 \end{array}$$

Qn. 8 → Find the total number of ways in which n distinct objects can be put in to two different boxes so that no box remains empty.

Sol:

$$\begin{aligned} & 2 \times 2 \times 2 \times 2 \dots n \text{ times} \\ & = 2^n \\ & = \underline{\underline{2}} \\ & = \underline{\underline{2^n - 2}} \quad \underline{\underline{Ans}} \end{aligned}$$

Qn 9 Find the sum of all the numbers that can be formed with the digits 2, 3, 4, 5 taken all at a time.

Sol:

✓ 2, 3, 4, 5
 ✓ but not all are used (since use all at a time)

$$\begin{array}{|c|c|c|c|} \hline 4 & 3 & 2 & 1 \\ \hline \end{array} = (24)$$

3

2, 3, 4, 5
(24)

1.

$$\begin{aligned}
 2 \times 6 &= 12 \\
 3 \times 6 &= 18 \\
 4 \times 6 &= 24 \\
 5 \times 6 &= 30 \\
 \hline
 &84
 \end{aligned}$$

(WORD)

~~MATH~~ MATHEMATICS

How many Four letter words?

Q10

M = 2	✓	<u>M</u>	<u>A</u>	<u>C</u>	<u>S</u>
A = 2					
T = 2	✓	<u>M</u>	<u>M</u>	<u>A</u>	<u>S</u>
C = 1	✓	<u>M</u>	<u>M</u>	<u>A</u>	<u>A</u>
S = 1	✓				

Can't all 4 letters are distinct
 $= 8C_4 \times 4!$

Can't 1 pair, 2 different
 $= 3C_1 \times 7C_2 \times \frac{4!}{2!}$

Can't 2 pairs
 $= 3C_2 \times \frac{4!}{2! \cdot 2!}$

Key ans = Can I + Can II + Can III

Q. 11

INVOLUTE

5 letter words containing & vowel &
3 consonants ??

Sol

4-V

4-C

$$= {}^4C_2 \times {}^4C_3 \times 5!$$
